

SCREEN FILTERS SPIN-CLEAN

These filters are used to clean water for drip irrigation systems. They clean well water, or relatively clean water and work especially well for filtering sand out of water but are not recommended for surface water containing algae. We recommend a pressure gauge on the filter inlet and outlet to determine when filter is clogging and to avoid unnecessary cleaning. For drip irrigation tape, mesh size should not be coarser than 120 mesh. Mesh size over 175 create unnecessary filter cleaning and clogging. Filters are built from a high heat, chemical resistant glass-reinforced plastic and have a stainless steel screen. Made in USA.

SIZE	ITEM #	MAX GPM	MAXIMUM WORKING PRESSURE	MINIMUM GPM FOR SELF-CLEANING FLUSH	MESH	PRICE
3/4"	SF-75	15	100 PSI	Arkal Disc Filter	150	\$ 15.00
1"	SF-100	20	100 PSI	7 GPM & Above	150	\$ 18.00
1 1/2" "T"	SF-150T	45	150 PSI	None	155	\$ 75.00
1 1/2"	SF-150	55	100 PSI	30 GPM & Above	150	\$ 130.00
2" "T"	SF-200T	65	150 PSI	None	150	\$ 78.00
2"	SF-200	80	100 PSI	60 GPM & Above	150	\$ 140.00
2" Super	SF-200S	110	150 PSI	None	155	\$ 230.00

Two optional gauges
*Add \$ 10.00 & "G"
to the end of the
Part Number.

PLASTIC DISK FILTERS

Disk filters are designed to clean dirty water for drip irrigation systems and handle up to 3 times more dirt and debris than screen filters, before cleaning is necessary. The design of the "disk" filter is a stack of disks pressed together. These disks have tiny grooves that allow clean water to pass through. To clean the filter, remove the cover, loosen the stack of disks and wash between the disks; reassemble. All filter mesh sizes are 120(125 Micron), other mesh sizes available. If your brand or model is not listed, please call.

NOTE: If filtering sand out of water, a screen filter will work better.
