Adjustable Stop

SOIL MOISTURE INDICATORS

The Irrrometer saves water and fertilizer!

Soil is like a sponge. Once wet, irrigating it further will neither make it hold more water, nor retain water longer. With an Irrrometer, optimum irrigation cycles can be established and scheduled. This saves not only water, but all other costs of irrigation as well.

Note: For air release, one service kit is needed per one or more Irrrometers.

ITEM#	DESCRIPTION	PRICE
1006	6" Irrrometer	\$82.00
1012	12" Irrrometer	\$84.00
1018	18" Irrrometer	\$88.00
1001	Service Kit	\$59.00

Watermark Sensors

Features

- * Range from 10-200 centibars
- * Fully solid state
- * Will not dissolve in soils
- * Linear accuracy even in moist soils (below 50 centibars)
- * Not effected by freezing temperatures
- * Internal compensation for commonly found salinity levels
- * Digital readout
- * Accuracy and stability
- * Convenient to use
- * Converts electrical resistance reading of sensor to centibars of suction

Benefits

- * Save water
- * Save energy
- * Produce better quality and yields
- * Inexpensive
- * Avoid excessive leaching of fertilizers
- * Easy to use

ITEM#	DESCRIPTION	PRICE
30KTCD	Meter	\$195.00
200SS5	Sensor	\$35.00
