Greenhouse Misters

Rivulis Irrigation

Growers choose the Rivulis FLF Low Flow Fog Spray for irrigation and as a method to alter the humidity and the evaporative climate in both greenhouses and high tunnels. The FLF is so versatile that it can be used as part of a cooling system in husbandry or for irrigation in both cutting propagation and seed germination. Because of the unique vortex flow, the FLF delivers the finest droplets even at low flow rates. Team up the FLF Low Flow Fog Spray with an anti-leak valve and you've got a system with some serious control. Once the irrigation system is shut off there is no more flow through the fog spray.

S2000

Rivulis Upright Micro Sprinkler

The S2000 & AquaSmart Micro Sprinklers feature flow regulation extending the use of the sprinklers in applications with sloping fields or long lateral runs. It can be installed in combination with a plastic stake, metal stake, or hanging assembly. The range limiter reduces the diameter of spray pattern. **Applications:** Short term crops such as vegetables and long term crops such as orchards. Install 12" - 24" above crop.
